Listen up Duramax owners...it is the main wiring harness for the duramax and the computer. Based on their location, they are apt to fray and short out. They happen so often there is now a service bulletin out on them. Great...get it fixed. Wiring harness wait time 4 days...new bracket to prevent fraying 10 to 12 days. WHAT!

Screwed by General Motors! 2500HD Duramax Owners Lookout ...

General Motors details a chafing problem in the FICM wiring harness (TSB #09-06-04-034) as it passes behind the alternator mounted on the front passenger side of the engine. This problem is caused by a poorly designed metal mount for the harness and requires a thorough inspection of the FICM harness where it passes behind the alternator.
