API RP 14E October 1, 1991 Recommended Practice for Design and Installation of Offshore Production Platform Piping Systems This document recommends minimum requirements and guidelines for the design and installation of new piping systems on production platforms located offshore.

API RP 14E - Recommended Practice for Design and ...

The API RP 14E provides minimum requirements and guidelines for design and installation of new piping systems on production platforms located offshore. The API RP 14E offers sizing criteria for platform piping lines across three categories based on flow regime: single-phase liquid, single-phase gas and two- phase gas/liquid.

API RP 14E Maximum Erosional Velocity Calculator Module Calculate API RP 14E maximum allowable erosional velocity for platform piping systems. The fluid density can be calculated for single phase, two phase, or three phase fluids. The erosional velocity is calculated from the fluid density and the C Factor.
