The NVIDIA Tesla C2050 Compute Processor card may be used alone, or with another C2050, or with a compatible graphics card. If used with a compatible graphics card, use of the C2050 DVI output is not supported The NVIDIA Tesla C1060 Compute Processor card is a dedicated computational unit, and must be

NVIDIA Tesla Compute Processor card installation
The Tesla C1060 was a professional graphics card by NVIDIA, launched in April 2009. Built on the 55 nm process, and based on the GT200B graphics processor, the card supports DirectX 11.1. Even though it supports DirectX 11, the feature level is only 10_0, which can be problematic with many DirectX 11 & DirectX 12 titles.
