It's not a rule set in stone, but essentially, if a device is wired-in such as a smart plug, light switch, or indeed a smart light bulb from the likes of Innr, it will act as a repeater. Battery-powered devices, such as motion and light sensors, don't tend to act as Zigbee signal repeaters - they can simply send messages to a repeater or hub.

Zigbee explained: Hubs, devices and everything you need to ...
