two interrelated theories by Albert

Einstein: special

relativity and general

relativity. Special

relativity applies to all

physical phenomena in

the absence of

gravity. General

relativity explains the

law of gravitation and

its relation to other

forces of nature. It

applies to the

cosmological and

astrophysical realm,

including astronomy.

Theory of relativity - Wikipedia

Albert Einstein gave the theory of relativity. This theory was based on the laws of physics are the same for all non-accelerating observers. Also, it says that the speed of light in a vacuum was independent of the motion of all observers.
