Crude Oil Lot Size. When trading crude oil, the minimum trade size is usually a 10-barrel contract. However, one of my brokers offers a 1-barrel contract. This isn't very common, though. A crude oil position of 10 barrels would cost you \$500 to open if you didn't have access to leverage. That is, at a price of \$50 a barrel.

Day trading crude oil is about speculating on short-term price movements, rather than attempting to assess the "real" value of crude. By using a combination of long and short positions, day traders can turn a profit whether the price of crude is rising or falling. Traders do this without ever physically handling crude oil.
