Now you can take the carburetor out of the weed eater. You are supposed to disassemble the carburetor to inspect inner parts, including the diaphragm and the needle. With the diaphragm, peel it off. If it is stiff and painful to move, you probably need a replacement. Remove the screws and the pin around the needle.

If a gas weed eater is stored on its side, the engine may have flooded. Let it rest for at least 15 minutes before starting it up again. An electric weed eater should also be stored upright in order to protect the parts from damage due to dust and debris from the ground traveling into the delicate parts of the machine.
